Flex Carry for the Motion® F5 Tablet PC or the C5 Mobile Clinical Assistant

QUICK SPEC

Backside clasps for secure and simple attachment

Shoulder strap

Integrated backside hand strap

1-year warranty

BENEFITS

Easily travel with the F5 or C5 with the comfortable shoulder strap

Integrated backside hand strap for a comfortable hold while writing

Easily docks and undocks into the F5/C5 Docking Station

The sealed F5 is a rugged, highly mobile tablet PC providing electronic clipboard functionality that is the ideal productivity tool for field workers who compute and enter data while standing or walking.

The C5 Mobile Clinical Assistant is a hospital-grade device specifically designed for use by clinicians across healthcare environments. Its rugged, disinfectable design, superior ergonomics and integrated features provide improved productivity while supporting the "five rights" of patient care (right patient, right time, right medication, right dosage, right route).

The **Flex Carry** is an ergonomic carrying solution designed specifically with F5 and C5 use in mind.

The Flex Carry clasps securely onto the back of the tablet PC to provide alternate methods for carrying and holding the device when in use.

It includes a comfortable shoulder strap for hands-free carrying throughout the workday. The hand strap positioned on the backside of the tablet PC also provides an alternative ergonomic and comfortable method of holding the tablet PC, while writing on or interfacing with the tablet display.

Designed with workflow in mind, the Flex Carry easily fits into the standard F5 and C5 Docking Station without requiring removal.
