Secure your most important passenger

Surfboard  
 Smart in-vehicle mounting

Surfboard is easy to install and remove

1 Just hook Surfboard under the back rest of the passenger seat

2 Rotate the unit down

3 Place the seat belt around Surfboard front groove

You're ready to go

## Introducing Surfboard

### The easy, cost effective mobile mounting solution

With advances in wireless and mobile technologies, safely securing a computer or other electronic devices in the vehicle is overlooked all too often. After the cost of hardware, networks and software fleet managers are then faced with the expense of securing the devices to the vehicle. Or worse still, they don't bother, resulting in equipment losses and injuries to employees from these devices flying around the cabin when the vehicle is cornering or suddenly stops.

**Why existing solutions are difficult and costly**  
Most existing mounting solutions are difficult and costly to install with the inflexibility of a permanent fixture. They require customized mounts, often drilling holes and other damage to the vehicle, experienced installers and vehicle downtime.

**Why Surfboard is simply a better solution**  
Fleet managers need a safe, secure but easy and quick to install mounting solution for computer and other electronic devices. Introducing Industrial Evolution's new revolutionary Surfboard, the easy to install temporary mounting solution.

Suits a wide range of laptops, monitors and other devices.

Surfboard accessories include this versatile Industrial Evolution aluminium docking station\*

Handy mouse pad and pen tray

Swivel mounting top for multidirectional movement

Sturdy, heat resistant long life design

Smart style complements modern cars' interior

\*accessories supplied separately

No drilling, no bolts, no expert fitting, no fuss
