

## Professional 4G Device for Multi-task and MCX

Supports MCX and eMBMS,  
QCI: 65, 66, 67, 69, 70

Fingerprint unlock prevents  
unauthorized access  
to the device and data

Two programmable keys  
meet a wide range of  
application needs

GCF certified

# Technical features

|  |                                                                                                                                                    |  |                                                                                       |
